

# CROSSING THE BARRIERS

The logo for 'Crossing the Barriers' features the word 'CROSSING' in a large, bold, sans-serif font. A stylized figure of a person in a wheelchair is integrated into the letter 'O'. Below 'CROSSING' is the word 'THE' in a smaller font, followed by 'BARRIERS' in a large, bold, sans-serif font. The entire text is set against a background of a stylized mountain range and a river or path.

## PREFACE

Montana is known for its vast natural resources and scenic beauty. Recreational opportunities seem endless for those that are able-bodied. Barriers to accessibility are sometimes sought-after challenges which enhance the outdoor experience. But to people with disabilities, these barriers can deprive individuals of the chance to enjoy the same recreational privileges that make the quality of life in Montana so appealing. Section 504 of the federal Rehabilitation Act of 1973, as amended, guarantees Montanans, and other visitors, the right to equal access.

This self-evaluation and transition plan is the first step by the Montana Department of Fish, Wildlife and Parks to remove some of the most critical barriers which currently exist on our sites and in our various programs. It is not fiscally or logistically feasible to make every site and program in our Department completely accessible. However, there are a number of important improvements we can and will make which will provide improved access and a better variety of choices for Fish, Wildlife and Parks recreation. We have entitled this new effort "Crossing the Barriers."

Success of the program to date has been achieved in part due to the efforts of a number of private citizens. Their help has been greatly appreciated and is making this project more effective than it could otherwise be. I encourage ongoing assistance and participation by anyone interested in improving accessibility to the Department's sites and programs. I welcome your ideas, support, and volunteer efforts. This report that we present to you is only the beginning of what will be an ongoing effort toward "Crossing the Barriers."

K. L. Cool, Director  
Montana Department of Fish, Wildlife and Parks

June, 1991

## I. INTRODUCTION

The Montana Department of Fish, Wildlife and Parks recognizes that all Montanans and visitors to the state have a right to recreation opportunities and access to recreational sites and facilities. Montanans with disabilities have the right to equal access guaranteed by Section 504 of the federal Rehabilitation Act of 1973, as amended. A copy of this Act is included as Appendix A. The federal rules that implement the Act are listed as Appendix B; they are not attached to this report, but are available from the Department upon request. Although total accessibility is often impossible to achieve in outdoor settings, it is the Department's intention to make a variety of sites as usable as possible to the greatest number of people, given the limitations of natural and physical features.

People with disabilities have a need for recreation just as all citizens do. Their need is frequently greater due to health issues that prohibit or decrease other life choices and create a greater than normal amount of leisure time. The elderly, while they are not always disabled, face the prospect of decreased stamina, endurance and agility, and an increase of leisure time. The elderly and disabled citizens of Montana represent a large and increasing number of people who have the need for barrier-free recreational opportunities. Disabled persons served by this Plan include those with mobility, visual, and hearing impairments, those with other physical conditions that limit their ability to utilize the outdoors, and those with developmental disabilities and learning disabilities.

Those who will benefit from accessible facilities and programs include a much larger group than those with permanent disabilities and the elderly. People who are temporarily disabled due to illness or injury, parents with young children, some pregnant women, people with less obvious disabilities such as back injuries and heart conditions, the very large and the very small, and even people who are able-bodied who enjoy using more well-developed facilities will all appreciate the convenience provided at accessible sites.

Montana's important tourist industry will benefit from the availability of publicized accessible recreational opportunities. Travelers who are disabled are keenly interested in using accessible facilities. These tourists will often plan their travel itineraries around such sites.

In response to this need and right, the Department has undertaken an in-depth study of its policies, programs, and facilities to determine its current status in meeting accessibility requirements, and to plan for and achieve necessary modifications and development. This effort has three basic components:

1. Self-evaluation;
2. Transition plan for increasing accessibility; and
3. Implementation of the plan.

Collectively, these efforts have been entitled "Crossing the Barriers." This program symbolizes the Department's commitment to removing barriers to people with disabilities.

The key to achieving improved accessibility is through implementation of policies and actions that were identified during the development of the transition plan.

## II. METHODS

The Department formed the Section 504 Accessibility Committee in March 1989, referring to Section 504 of the Rehabilitation Act of 1973. The Committee was composed of eight staff people, representing most of the divisions within the Department and a disability consultant. Appendix C includes current Committee members as well as members of the original Committee. The divisions included: Administration, Conservation Education, Field Services, Fisheries, Management Services, Parks, and Wildlife. The consultant on disability issues has expertise in the areas of disability awareness training, barrier removal, disability rights, and recreation. The consultant has a disability and uses a wheelchair. She was invaluable throughout the entire process.

Regional coordinators were appointed to work with the 504 Accessibility Committee. These individuals were trained on awareness and inventory techniques using the developed handbook. They acted as a contact point for field communication and provided quality control for site evaluations. It was decided that Department personnel should conduct the evaluations to obtain internal ownership for the program, rather than contracting the work. Separate forms and computer software were developed for the site evaluations and the programmatic evaluations. Computerization will facilitate updates as other sites are evaluated and transition plan targets are met.

The major activities of the Department are addressed in detail in sections in this document and are as follows:

### Self-Evaluation

#### 1. Site Surveys

The following activities were undertaken for site surveys: the development of self-evaluation site survey forms, field testing of the survey forms, appointment of Section 504 Regional Accessibility Coordinators within the Department, training of the Regional Coordinators in the use of the survey

forms, coordinating and conducting the survey process, and computer input and analysis of site data.

## 2. Programmatic Surveys

The following activities were undertaken to survey Departmental programs: the development of questionnaires for programmatic surveys, conducting intra-divisional discussions, conducting the surveys, and analysis of the data.

### Transition Plan

The Committee analyzed the site survey data and programmatic survey data. Based upon this information, a draft Transition Plan was developed. The draft Plan included policies, and identified actions to be taken by the Department to improve accessibility. Part of the process involved meeting with Division Administrators and Regional Supervisors regarding the new policies which the Committee proposed.

The Committee presented the draft Plan for public review and comment during Spring 1990. The review process included public meetings and mailings to selected individuals, including the Disabled Resource Advisors, requesting comments. Appendix D includes detail on the public review process and comments received.

Revisions were incorporated into this final Plan following the external review and another internal review. This final Plan incorporates public and internal comments, and has been approved by the Director.

### Implementation of Plan

Up to this point, much effort has gone into determining the existing level of accessibility and projecting the needs for improvements to sites and programs. Implementation of the plan involves putting into action the policies and tasks identified.

Implementation of the Transition Plan is the responsibility of the Department as a whole, and will be directed by the Section 504 Coordinator. A detailed discussion of how implementation is to occur begins on page 10 of this document.

## III. SELF-EVALUATION

Self-evaluation of the Department's programs and sites is required by Section 504 of the Rehabilitation Act of 1973, as amended. The purpose of the self-evaluation was to inventory the Department's programs, areas, and facilities to determine existing accessibility to, and usability by, people with disabilities.

In conducting its self-evaluation, the Department undertook various actions: survey of sites, survey of programs, training of personnel, consultation with disabled resource advisors, and development of the computer program for evaluating site surveys.

In designing its self-evaluation, the Department relied heavily upon an excellent publication entitled "Accessible Fishing: A Planning Handbook," prepared for the State Park and Recreation Division of the New Mexico Energy, Minerals and Natural Resources Department. Although the Handbook focuses on accessible fishing sites, the guidelines were extremely useful in planning for a wide range of outdoor recreation activities and programs. The full citation for this Handbook is included in the Bibliography. It is also listed as Appendix E; it is not attached to this report but is available upon request from the Montana Department of Fish, Wildlife and Parks.

#### A. Site Survey

Site survey forms were developed by the Section 504 Accessibility Committee. Site surveys were conducted by the Regional Section 504 Accessibility Coordinators throughout the state. A copy of the Site Survey Handbook is listed as Appendix F; it is not attached to this report, but is available from the Department upon request.

For the Site Survey, the approach used for self-evaluation was based on a "Level of Accessibility" concept that defines degrees of difficulty of access for people with various types of disabilities:

- Level 1 - Accessible
- Level 2 - Usable
- Level 3 - Difficult
- Level 4 - Not Accessible

For further explanation of these levels, refer to Appendix G.

If a modification to the area is necessary (if it is a level 2, 3, or 4), then the following is used in assigning a modification ranking:

- A. Modification not necessary
- B. Can be easily modified
- C. Needs extensive modification
- D. Modification not recommended

For further explanation of these modification criteria, refer to Appendix H.

The guidelines used served a dual purpose, in that they were used both as criteria for judging levels of accessibility and as suggestions for improving recreational opportunities for people with disabilities. The Department administers over 500 sites

statewide. Thirty percent of the total was surveyed as of September 1989, and another thirty percent of the total was surveyed by September 1990. It is recommended that the remainder be surveyed over the next two years. A schedule for conducting these surveys is attached as Appendix I.

Existing facilities were compared to a standard of total accessibility as defined in the Uniform Federal Accessibility Standards and the American National Standards Institute, Inc. Additional information was obtained from the New Mexico State handbook, "Accessible Fishing: A Planning Handbook;" and the Nebraska State accessibility survey.

To assist with and provide specific technical data and information, the New Mexico "Accessible Fishing" handbook was used as a resource document. Although this handbook was written specifically for fishing access, it was utilized to survey a broader variety of recreational areas and facilities.

#### **B. Program Survey**

The Programmatic Survey was developed and conducted by the Committee and additional staff. Programs and Department-wide support activities (such as enforcement, public relations, and personnel policies and practices) were surveyed to determine their usability to people with different types of disabilities. A copy of the program questionnaire that was used is attached as Appendix J.

#### **C. Training**

Several types of training were undertaken during the self-evaluation:

1. The consultant conducted disability awareness training for the Committee early in the process. Because the consultant was a participating member of the Committee, ongoing information, instruction and feedback were provided.

After the survey forms were developed, the Committee members field-tested the survey on a day-long field trip. They conducted the surveys and simulated being disabled by using wheelchairs, crutches, canes, and blindfolds. This experience greatly increased their awareness of the barriers to people with disabilities.

2. The training of the Regional Coordinators was a two-day workshop conducted in Helena by members of the Committee. The major components of the training were disability awareness, presentations by several people with different disabilities, disability simulation, instruction on conducting the survey and use of the Accessibility Manual, and an opportunity to

field test the survey forms at a variety of sites near Helena. The outline for this training is included as Appendix K.

3. Training of the Design and Construction Bureau staff included disability awareness, disability simulation, and information on site accessibility and modification.

#### **D. Disabled Resource Advisors**

A number of people with disabilities and disability organizations from across Montana were willing to serve in a resource capacity to the Regional Accessibility Coordinators and the Committee to assist them in the survey process. Their assistance was requested on a limited basis, but was valuable and very much appreciated. The Department and Regional Coordinators will use them as consultants in the future.

#### **E. Computer Program**

As the survey questionnaires were completed, the data was inputted. The data included the name of the site, its type, the current level of accessibility, and the level of modification needed.

The data have been compiled in various forms. The first form (Appendix L-1) is raw data, a complete printout of all the questionnaires' answers to each particular element. The second portion (Appendix L-2) has been printed in summary, indicating the summary for the various elements and the summary for the total site. This printout does not include sites that were not inventoried. The third printout includes modifications required (Appendix L-3). This printout is organized by region, and each region is subdivided into categories of site type. The last portion of the compilation of this survey is the written comments (Appendix L-4). These comments are taken verbatim from the questionnaire forms as submitted from the Regions. Appendices L-1, 2, and 4 are available upon request. Appendix L-3, Modifications Required, is attached.

It should be noted that the selection of projects for site evaluation has been based upon various criteria, such as high usage, location near populated areas, sites which lend themselves to accessibility modifications, sites which provide the best possible balance statewide - both geographically and programmatically - and funding availability. These questionnaire summaries and proposed modifications will be referred to when projects are selected, based upon criteria used by the Fisheries and Parks Divisions.

#### **F. Existing Efforts**

The Department has already begun efforts to make its sites and programs accessible to people with disabilities. The following are

among the projects already undertaken or underway in various divisions:

Department-wide

Sites with accessibility improvements such as trails, parking and latrines which were made prior to or during FY'90 include:

Region 1 - Kalispell

Kiwanis Lane SFAS  
Lambeth SRA  
Logan SRA  
Region 1 Headquarters  
Somers SRA

Region 2 - Missoula

Beavertail Hill SRA  
Council Grove SM  
Forest Grove SFAS  
Placid Lake SRA  
Region 2 Headquarters  
Salmon Lake SRA  
Lost Creek SP

Region 3 - Bozeman

Bannack SP  
Bozeman Pond SFAS  
Carter's Bridge SFAS  
Drouillard SFAS  
East Gallatin SRA  
McAtee Bridge SFAS  
Missouri Headwaters SP  
Notch Bottom SFAS  
Region 3 Headquarters  
Salmon Fly SFAS  
Springdale Bridge SFAS

Region 4 - Great Falls

Ackley Lake SFAS  
Bean Lake SFAS  
Beartooth SRA  
Black Sandy SRA  
Chinaman's SRA  
Hellgate SRA  
Causeway SRA  
Giant Springs/Heritage SP  
Pelican Point SFAS  
Pishkin Reservoir SFAS  
Spring Meadow SRA  
York Bridge SFAS  
Region 4 Headquarters

Region 5 - Billings

Arapooish SRA  
Bratten SFAS  
Chief Plenty Coups SM  
Cooney SRA  
Greycliff Dogtown SM  
Mallard's Landing SFAS  
Pictograph Cave SM  
Regional Headquarters

Region 6 - Glasgow

Region 6 Headquarters  
Duck Creek SFAS

Region 7 - Miles City

Makoshika SP

Region 8 - Helena

Department Headquarters  
in Helena

**Note:**

SFAS = State Fishing  
Access Site  
SM = State Monument  
SP = State Park  
SRA = State Recreation  
Area

The following capital projects for FY'90-91 will be developed as accessible sites as funds are available:

Region 1 - Kalispell

Finley Point SRA  
Kokanee Bend SFAS  
Teakettle SFAS  
Wayfarers SRA  
Woods Bay SRA

Region 2 - Missoula

Beavertail Pond SFAS  
Harper Lake SFAS  
K. Ross Toole SFAS  
Washoe Park Hatchery  
Woodside Bridge SFAS

Region 3 - Bozeman

Harrison Lake SFAS  
Lewis & Clark Caverns SP  
Campground  
Concession

Region 4 - Great Falls

Big Bend SFAS  
Holter Lake Boat Docks SRA

Region 5 - Billings

Cooney SRA  
Lake Elmo SRA  
Gritty Stone SFAS  
Pictograph SM

Region 6 - Glasgow

Dredge Cuts SFAS

Region 7 - Miles City

Makoshika SP  
Regional Headquarters  
Tongue River SRA

Region 8 - Helena

Canyon Ferry SRA

Conservation Education

The Conservation Education Division's Hunter Education Program has provided classes for a limited number of Montana's disabled residents on a case-by-case basis. The Montana School for the Deaf and Blind has two staff members certified as Hunter Education instructors, who are conducting firearm safety classes for their students. Throughout the state, other instructors have conducted classes for youth with physical disabilities, developmental disabilities, and learning disabilities. The majority of the classes are held in public buildings (schools, libraries, and fire halls) that are accessible. Upon request, alternative testing methods are used for students with disabilities.

Field Services

The Department's disabled accessibility efforts are coordinated by the Field Services Division. The Accessibility Coordinator and supporting administrative staff are located in this Division.

The Design and Construction Bureau is located in this Division. The Bureau provides expertise and the necessary design and engineering support functions for facility and site evaluations or improvements. Bureau staff have attended training courses and have experience in implementing accessibility features.

### Fisheries

The Department issues a disabled resident conservation license for \$2.00, which allows a holder to fish without also purchasing a fishing license. In the Fisheries Division's statewide Angler Survey, the senior, youth, and disabled are included as a distinct group. This information will provide guidance and direction for future management and regulation decisions as they apply to specific interest groups.

### Parks

Camping is provided at a 50 percent discount to senior citizens and people with disabilities who possess the federal Golden Access Passport as proof of disability.

### Management Services

Employment practices in the Department currently are in compliance with Section 504 regulations. Management Services staff coordinate with the Director's Office, the Design and Construction Bureau, and others in developing funding proposals for the State Legislature for accessibility improvements at Department sites.

### Wildlife and Enforcement

The Department currently has a booklet available entitled: "The Outdoors is for Everyone," which is designed to encourage people with disabilities to utilize and enjoy outdoor recreation. The Department also has 25 antelope permits available for qualified disabled hunters. A special discounted rate license is also available with the purchase of a disabled resident license. Non-ambulatory hunters are allowed to hunt from a vehicle and/or shoot from the shoulder of the road. These practices are prohibited for the able-bodied.

These accomplishments were taken into account as part of the self-evaluation. As is explained in detail in the Transition Plan, additional Department-wide and division efforts are needed to supplement existing efforts.

## **IV. TRANSITION PLAN**

The purpose of the Transition Plan and the program, "Crossing the Barriers," is to formulate both long-range and short-range policies for the Department in regard to the accessibility of its facilities and programs for people with disabilities. The Plan is a statement of new policies on access which will have a major impact on the

future of accessibility in the Department. It is also a working document to be used to determine annual and biennial plans for modifying existing facilities and sites for the removal of barriers, and to incorporate accessibility standards in all new development.

The Transition Plan consists of several components:

1. Removing existing barriers at sites for people with different types of disabilities;
2. Ensuring that programs and services are available to Montanans and visitors with disabilities; and
3. Broadening the policies of the Department to include accessibility for people with disabilities in plans for future program and site development.

It will require funding and employee time to achieve the policies and work items outlined in this transition plan. Many of the efforts will require relatively small amounts of time and money to achieve. Others, however, involve new work efforts that will require considerable funding. It will take several years and will require approval from the Montana Legislature to accomplish major new projects. This has been taken into consideration in the preparation of Appendix M, which is a summary of activities to be accomplished and the positions within the Department that have responsibility for accomplishment of each activity.

Modification of existing sites and the removal of barriers are essential, but are only a partial and temporary solution to accessibility. Accessibility will now be a determining criterion in Department policies and in plans for future program and site development. With the positive policy and position statements below, access to Montana's recreation sites, facilities, and programs will be ensured for all Montanans, able-bodied and disabled alike.

To that end, the Transition Plan includes policies and activities that are Department-wide. It also includes policies and activities that apply to specific divisions.

#### **A. Policies/Action Items to be Implemented Department-Wide**

The following are now Department-wide policies and action items designed to achieve accessibility for both programs and sites. A list of items to be accomplished and positions responsible are included in summary form in Appendix M, attached.

Following this list of Department-wide policies and action items is another section listing specific actions to be undertaken by each

division in the Department (p. 15).

### 1. Accessibility as a Criterion for Project Selection

Accessibility for people with disabilities will be one of the determining criteria for project selection, project design, project funding, land acquisition by easement, lease or purchase, development, and program implementation. The Division Administrators will be responsible to assure that accessibility for people with disabilities is given consideration in future budget proposals.

Choice of sites will be based upon the following guidelines:

- High public use areas
- Near populated areas of the state
- Lend themselves to accessibility modification
- Provide for the best possible balance statewide, both geographically and programmatically
- Funding availability

Capital projects that fit the above criteria will include appropriate accessibility elements and be made accessible where feasible.

Sites which were evaluated for accessibility in summer 1989 and 1990, and were recommended for accessibility development, will be given priority for FY 1992-1993.

### 2. Accessibility Coordination

The Department's Accessibility Coordinator, or his or her designee will:

- Ensure implementation of this transition plan and compliance with the accessibility requirements mandated by federal and state law in all Department plans, projects, and programs with the assistance and support of the Director;
- Continue to work with a support committee for the ongoing implementation of the Plan, and with special committees as needed to address specific disability issues;
- Act as a liaison with disability organizations and people with disabilities throughout Montana;
- Be responsible for the publication and distribution of information pertaining to the Department's progress in providing for accessibility; and

- Develop and maintain a current library of recreational resources, sites, programs and equipment for the disabled in Montana and in other states.

### 3. Resource Advisor Lists

Each region will develop and biennially update a list of disabled resource people, their advocates, and interpreters for the deaf. These resource people may act as advisors and consultants on projects and programs and may consult on site modifications. The Regions will consult with them twice a year regarding new programs and projects that people with disabilities can utilize or participate in. They should be participants in task forces to discuss the specific recreational needs of people with disabilities and the elderly. Interpreters should be used upon request during public meetings or programs.

### 4. Publicize Accessibility Efforts

The Department will:

- Publicize a list of the Department's accessible facilities and programs;
- Distribute the accessible facilities list to those purchasing disabled licenses and permits at the Helena and regional offices;
- Promote accessible sites and programs through newspapers, radio and television; and
- Use the international symbol for accessibility and the "Crossing the Barriers" logo to designate only those sites that are accessible or usable (Accessibility Levels 1 or 2).

### 5. Partnerships

The Department will:

- Encourage volunteer efforts for site or program improvements through community and service organizations, sportsman's clubs, etc.;
- Develop partnerships with community and service organizations, and with state, federal, and local agencies to obtain funding or in-kind contributions to develop accessible sites and programs; and
- Coordinate with the Montana Department of Commerce, the State and local Chambers of Commerce, and other state, federal, and local agencies to publicize information on accessible facilities.

### 6. Disability Awareness Training

All permanent employees with supervisory responsibility and those who frequently work with the public will participate in a

disability awareness training which will include information on the rights and laws regarding equal access by people with disabilities. Other employees will also be encouraged to attend.

The basic training program will be developed by the Section 504 Accessibility Coordinator and will include disability awareness training, information on laws, rights and needs of people with disabilities, and disability simulation whenever possible. This training will be provided for new staff members. Division Administrators and Regional Supervisors will be responsible for ensuring that new Helena and regional staff, including seasonal staff, receive training. Each division and region will be responsible for the specific training of its own staff on accessibility, as it pertains to that division or region and its programs.

#### **7. Transition Plan Update**

The Transition Plan will be reviewed and updated every two years.

#### **8. New Programs**

All new programs will be developed to be as accessible as possible for both users and staff. Training, materials, and instruction will meet accessibility standards as described in this document.

#### **9. Public Notices and Meetings**

Announcements of key meetings will be posted in several accessible, high-use locations, as well as in the newspaper and on radio. Notices will be stated or written in easy-to-understand language (fourth grade level).

Meetings will be held in accessible buildings. The meeting place will be clearly stated in announcements, and clear directions to the specific room within the building will be provided. The Department will encourage sportsman's groups to meet in accessible places, at least when the Department meets with them as part of their own regularly scheduled meetings. Those selecting meeting times should consider the availability of public transportation and try to hold meetings during times when it is available.

Each region will be responsible for surveying frequently used meeting places for accessibility, using the site survey forms if necessary, and keeping an up-to-date list of accessible meeting places.

Meeting room set-up will be accessible. Sound equipment will be used if the room is large. Acoustics and lighting will be checked to provide the best possible conditions for hearing and visually impaired persons. Displays will have large print and will be easy to read. Handout materials will be available in large (18 point)

print at key public meetings. When meetings are recorded, the tapes will be made available.

Presentations and printed material will be written or stated in easily understood language.

A list of suggestions for setting up and conducting accessible meetings will be produced. Facilitators and leaders will receive training concerning disability awareness and sensitivity issues.

Should a request be made, an interpreter will be provided. If not available, information about the meeting will be provided in written form.

#### **10. Public Surveys**

A list of suggestions for conducting public surveys will be developed. All survey instructions and questions will be readable and easily understood. Surveys will be available in large print size (18 point) upon request. Oral surveys will also be available in written form if requested.

Surveyors will receive information concerning disability issues, dealing with the difficulties the survey might impose, and advising people with disabilities about alternative methods for giving or receiving the information.

All surveys will be reviewed to determine the feasibility of including questions directed to people with disabilities, asking for their comments and suggestions about their own use of sites, facilities, or programs. This data will be kept on file for future reference or use.

#### **11. Survey All Remaining Sites**

All sites not surveyed in 1989 will be evaluated over a three-year period. A total of 55 percent of the sites will be surveyed by 1990, 80 percent by 1991, and 100 percent by 1992.

#### **12. Headquarters to be Made Accessible**

The Helena and Regional Headquarters that do not meet standards will be made accessible.

#### **13. Telephone Device for the Deaf (TDD)**

A Telephone Device for the Deaf (TDD) has been purchased and installed at the Helena headquarters. The telephone number is 406-444-1200. Each regional headquarters will have a TDD installed if use of the Helena TDD warrants it.

#### **14. Facility Reservation and Enforcement**

Day use, camping, and parking sites reserved for people with disabilities, and which are signed and marked with the international symbol for accessibility, will be reserved for the exclusive use by people with disabilities. Other designated accessible facilities such as restrooms, fishing docks, and boat ramps will be available on a first-come, first-served basis. Boat unloading zones designed for the disabled will be developed at some areas. These may be used by others when disabled persons are not using a site.

The Department will adopt rules or seek legislation to establish authority to enforce the site reservation system.

#### **B. Policies/Action Items to be Implemented by Specific Divisions**

In addition to Department-wide programmatic and site modifications to be accomplished, specific divisions are further responsible for accomplishing the following efforts and complying with the following policies. As with Department-wide items, these are designed to achieve accessibility to both programs and sites. A description of each item to be accomplished and the position(s) responsible are stated in summary form in Appendix L.

##### **1. Conservation Education - Information and Education**

"Montana Outdoors" will promote accessibility for people with disabilities through articles on barrier-free sites, facilities, programs, and recreational opportunities.

All printed materials will be considered for large print (18 point) production. Key articles, regulations, and important public information will be available in large print upon request at the Helena and Regional headquarters. Other publications will be made available in large print upon request if feasible. New and updated brochures will include information on accessible sites, programs and resources.

With the assistance and coordination of the Department Section 504 Accessibility Coordinator, blind persons will be asked to assist the Department in determining the best method of producing specific material for their use. Their input will be taken into consideration by the Conservation Education Division in the future.

Selected new and existing films and videos will be captioned, where feasible, for the deaf community. Printed scripts of selected, high use films and videos will be made available upon request.

All future productions of a non-technical nature will have easy-to-understand language (fourth grade level) if they are to be used by the public. All public showings of films will be held in accessible buildings. (See public meetings section.)

In Department education programs such as Hunter Education, printed materials will be barrier-free and usable. Films will be captioned, or printed scripts will be available whenever possible. Instructor guidebooks and instructor training will include information on teaching people with disabilities.

Educational programs will be held in accessible facilities. Outdoor training areas will be chosen to provide the best possible access. (See public meetings section.) Shooting ranges funded by the Department will include accessibility improvements.

New displays and exhibits will be designed as accessible. There will be an increase in the number of tactile exhibits with raised letters for the blind in selected high use areas and regional headquarters.

## **2. Field Services - Coordination and Engineering**

The Division will provide coordination of the Department's accessibility efforts through its Division Administrator, who serves as the Chairman of the Accessibility Committee.

The Design and Construction Bureau will provide design and engineering support services and coordinate with regional and Helena staff in achieving accessibility improvements at sites and facilities that meet policies and guidelines contained in this document.

## **3. Fisheries - Fishing and Boating**

At least one site used for fishing in proximity to all population centers of 10,000 or more will be made accessible to a Level 2 Accessibility (Usable). In addition, the Giant Springs or Washoe Park Fish Hatchery will be made accessible to a Level 2 (Usable) and will have exhibits for people with visual impairments.

Ten percent of the annual FAS development budget will be targeted for upgrading the sites to Level 2 Accessibility (Usable) as defined in the DFWP Site Survey Handbook on elements rated "B" (potential good -- can be easily modified) on the accessibility survey. The goal will be to bring all necessary elements at selected sites to Level 2 Accessibility. Areas chosen will meet criteria listed on page 12 of this document, with the 1989 and 1990 surveyed areas receiving highest priority. Sites will be identified in the annual work plans.

Fishing regulations will be made available in 18 point print or on audio tape for the visually impaired. As brochures are written and edited, they will employ easy-to-understand (fourth grade level) language. Slide shows will have printed scripts available upon request. A fishing access brochure listing accessible facilities and programs will be produced in conjunction with other divisions.

Current fishing license policies will be reviewed as to how they apply to people with disabilities, and recommendations for improvement will be made.

#### **4. Administration and Finance - Personnel and Employment**

The hiring policy will be amended to provide that interviews be held in accessible facilities as need dictates, and an interpreter or reader will be provided upon request at interviews.

Helena area seasonal and temporary positions will be reviewed to determine possible suitability for people with disabilities. The Personnel Officer and Section 504 Accessibility Coordinator will consult with divisions as appropriate.

The Division will coordinate with the Director's Office, Design and Construction Bureau, and other Department staff in preparing requests to the State Legislature for funding of accessibility improvements to sites and programs.

#### **5. Parks - Historic, Natural, Recreational**

All Class I and II State Parks will be made accessible where feasible, and where funding is available. In addition, at least three accessible State Parks in each region will have an interpretive or nature trail for use by people with visual impairments or other disabilities.

Ten percent of the sites per year will be targeted to be upgraded to Level 2 Accessibility as defined in the DFWP Site Survey Handbook on elements rated "B" on the accessibility survey. The goal will be to bring selected sites to Level 2 Accessibility. Areas chosen will meet criteria listed on page 12 of this document, with the 1989 and 1990 surveyed areas receiving highest priority. Sites will be identified in the annual work plans.

Brochures for programs will include information regarding access and use by people with disabilities. A brochure will be produced in conjunction with other divisions, listing accessible programs and facilities. Regulations and other selected printed materials will be available in 18 point print upon request at Helena and Regional Headquarters. Films and public meetings will meet accessibility standards and goals listed in other parts of this report.

Programs such as the Snowmobile and the Montana Conservation Corps programs will meet accessibility standards and policies listed in other parts of this plan.

Instructors, guides and other key personnel will receive training in disability awareness and program modification for use and access by people with disabilities.

The Parks Division will encourage disability awareness in its dealings with local clubs, groups, travel promotion organizations, and business people who promote recreational programs.

#### **6. Wildlife - Hunting and Wildlife Appreciation**

Accessible wildlife appreciation areas and interpretive displays will be developed for vehicular or non-vehicular travel at the following sites:

Ninepipe - northwest sector;  
Freezeout - central sector; and  
Canyon Ferry - south central sector.

A trail for use by the visually impaired will be developed at the Freezeout Wildlife Management Area. Sites in other regions will also be considered for accessibility development.

The division will use disabled resource advisors on a task force to discuss how hunting can be made more available to people with disabilities. Their recommendations will be considered in future programmatic and site development plans.

Current hunting license and special permit policies will be reviewed as to how they apply to people with disabilities, and recommendations for improvements will be made.

Hunting regulations will be available in 18 point print at regional and Helena headquarters and public libraries. Selected brochures will be available on tape. The Wildlife Division, in conjunction with other divisions, will produce a brochure listing accessible facilities and programs.

#### **V. CONCLUSION**

The Montana Department of Fish, Wildlife and Parks, and specifically the Section 504 Accessibility Committee, has, through the process of the 504 Accessibility Study, come to a new awareness of the barriers which people with disabilities face each day. All those involved have gained insight and appreciation of how a seemingly insignificant step, curb or slope can be an insurmountable, frustrating, and even dangerous obstacle to some people, and that others face great difficulty in effectively

communicating a need or asking a question about an activity in which they wish to participate.

People with disabilities are people with abilities as well, and they have already effectively and often amazingly demonstrated that anything is possible. The elimination of architectural, environmental, and attitudinal barriers within the Department will provide for endless recreational opportunities for all Montanans and this state's visitors. The Department is committed to providing equal access to Montana's vast recreational resources today and in the future.

**APPENDIX A**

**SECTION 504 OF THE REHABILITATION ACT OF 1973**

REHABILITATION ACT OF 1973  
(As Amended in 1978)  
Title V, Section 504

Nondiscrimination Under Federal Grants and Programs

Sec. 504. No otherwise qualified handicapped individual in the United States, as defined in section 7 (7), shall, solely by reason of his handicap, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance or under any program or activity conducted by any Executive agency or by the United Postal Service. The head of each agency shall promulgate such regulations as may be necessary to carry out the amendments to this section made by the Rehabilitation, Comprehensive Services, and Developmental Disabilities Act of 1978.

## **APPENDIX C**

### **SECTION 504 ACCESSIBILITY COMMITTEE MEMBERS**

## APPENDIX C

### SECTION 504 ACCESSIBILITY COMMITTEE MEMBERS

#### CURRENT PARTICIPANTS

##### Department Personnel: Name, Title, and Division

Jerry Wells	Accessibility Coordinator (June 1990 to present) Phone: (406) 444-2602 Administrator, Field Services Division
Bobbi Balaz	Federal Aid Coordinator, Administration and Finance
Tim Gallagher	Assistant Administrator, Fisheries
Steve Knapp	Habitat Bureau Chief, Wildlife
Dick Mayer	Design and Construction Bureau Chief, Field Services
Mary Ellen McDonald	Administrative Officer, Parks
Tim Pool	Recreation Safety Education Programs, Conservation Education
Olive Price	Personnel Specialist, Administration and Finance

##### The following staff have also provided additional valuable support:

Candace Coefield	Administrative Aide, Field Services - for word processing, data entry, and administrative support
Barb Sheline	Division Secretary, Field Services - for administrative support
Eileen Shore	Attorney, Administration - for consultation

##### Accessibility Consultant

Judy Harris	Consumer Affairs Specialist with Montana Independent Living Project (at the time of inception of this project). Currently a private consultant on disability issues.
-------------	--

#### 504 Regional Coordinators and Alternates

- Region 1, Kalispell -- (406) 752-5501  
Marty Watkins, Parks Operations Specialist  
Laney Hanzel, Fisheries Biologist
- Region 2, Missoula -- (406) 542-5500  
Lee Bastian, Parks Manager  
Doug Frazier, Parks Maintenance Supervisor
- Region 3, Bozeman -- (406) 994-4042  
Jerry Walker, Parks Manager  
Ray Haegney, Parks Operations Specialist
- Region 4, Great Falls -- (406) 454-3441  
Dave Todd, Parks Manager  
Doug Haberman, Smith River District Parks Manager
- Region 5, Billings -- (406) 252-4654  
Rich Pittsley, Parks Operations Specialist  
Michael Poore, Fisheries Biologist
- Region 6, Glasgow -- (406) 228-9347  
Jim Liebelt, Information Officer  
Art Warner, Regional Supervisor
- Region 7, Miles City -- (406) 232-4365  
Neil Martin, Wildlife Manager  
Ken Walcheck, District Information Officer
- Region 8, Helena -- (406) 444-2602  
Patrick Gubbins, Parks Manager  
Norm Peterson, Regional Supervisor

#### **PREVIOUS PARTICIPANTS**

The efforts of additional personnel who contributed previously are also appreciated. These include:

Arnold Olsen	Former Chairman of the Committee Current Administrator of the Parks Division
Don Bianchi	Information Officer, Region 3
Leo Klotz	Wildlife Maintenance Worker, Region 4
Doug Monger	Assistant Administrator, Parks Division
John Munding	Resource Assessment Unit
Mark Soderlind	Game Warden, Region 2

Special appreciation goes to Gene Allen, who was the original Chairman of the Committee and Associate Director of the Department, and has since retired.

**APPENDIX D**  
**PUBLIC REVIEW AND COMMENT**

## APPENDIX D

### PUBLIC REVIEW AND COMMENT

#### Summary and Evaluation of 504 Public Meetings

Eight public meetings were conducted to obtain public comment and suggestions on the Draft of the Transition Plan for Accessibility to People with Disabilities.

The meetings were publicized through news releases to the papers in the eight communities. Copies of the news release were also mailed to all persons and agencies on the mailing list. All of the meetings were held in accessible facilities and ran from 7 to 9 p.m.

Attendance at the meetings was as follows:

<u>City</u>	<u>Attendance</u>
Helena	4
Great Falls	2
Havre	5
Bozeman	2
Billings	8
Kalispell	4
Miles City	0
Missoula	6

Attendance was disappointingly low. Several factors may account for this in part:

1. People with low incomes and/or disabilities often do not subscribe to the newspaper.
2. These same people are frequently dependent on public transportation which does not operate after 4:30 p.m.
3. People with visual impairments may not receive the newspaper.
4. The news stories appeared on sports pages in some communities.
5. The wording of the article headings misled several people, who misunderstood the purpose of the meeting.
6. It appeared that those who knew about the meetings failed to inform their disabled clients, patients, etc. of the meeting.

In the future, meetings will be publicized through several media - radio, TV, and the press. Alternative meeting times will be considered as a possibility. Invitations should be sent to individuals and organizations that support the handicapped.

The meetings included a 30-minute presentation and then discussion. The charts and handouts were helpful and worked well. Overall, the response to the meetings was very positive and discussion was excellent.

The comments and suggestions are compiled below. They are categorized under the following headings:

1. Accessibility at specific sites.
2. Accessibility to specific components or features.
3. Accessibility to people with specific disabilities.
4. Accessibility to specific recreational activities.
5. Hunting.
6. Financial issues.
7. Capital projects.
8. Wildlife and wilderness areas.
9. Cooperation with other federal and state agencies.
10. Publicizing and conducting public meetings.
11. Future communication with disabled public.
12. Licensing.
13. Other comments.

If the comment was made at more than one meeting, it will be so noted in the left-hand column indicating those regions.

To complete this summary, a brief report of each meeting will be included. Comments alone may not adequately convey the issues about which the group felt most strongly, or the level of interest expressed.

#### Accessibility at Specific Sites

<u>Region</u>	<u>Comment</u>
1	1. <u>Woodside Bridge</u> or <u>Clearwater Junction</u> - possible sites for bird watching. Access needs: -improve trail -keep asphalt to a minimum -bench for seating needed

- 1                    2. Wayfarers is frequently used.  
                     Access needs:  
                     -continuous handrail not needed  
                     -swimming area needs improvement  
                     -provide handrail along swimming pier  
                     -need more supports in swimming area
- 1, 4                3. Freezeout Lake - good site for bird watching and wildlife viewing.  
                     Access needs:  
                     -provide primitive roads for the exclusive use of the disabled  
                     -if walking trail is constructed, it should be no more than a one-mile round trip
- 1                    4. Ninepipe  
                     Access needs:  
                     -improved and more frequent highway pullouts along Highway 93  
                     -turnout to Charlo, then left into Ninepipe is good
- 1, 4                5. Lewis and Clark Caverns  
                     Access needs:  
                     -would DFWP provide a minimal opportunity - perhaps provide access to one room  
                     -path is too strenuous; provide an option such as a shuttle  
                     -provide "loaner" wheelchairs for areas of difficulty  
                     -provide periodic rest stops along trails  
                     -provide opportunities for people with disabilities and elderly to participate in structured tours upon request  
                     -staff need disability awareness training on how to modify tours to include elderly and disabled
- 1                    6. Hidden Lake has paved walkways but needs rest areas along the paths.
- 4                    7. Willow Creek - there is an accessible restroom, but it is not located near the most accessible area.

- 4 8. Yellowstone Park (National Park) - has very poor accessibility provisions. What is advertised as accessible often is not.
- 4 9. Giant Springs - ramp near restrooms is too steep.
- 4 10. Department of Highways rest stops - more should be accessible and should be open all year.
- 4 11. Ulm Pishkun is being used for wildlife viewing.
- 5 12. Spring Creek access - near hatchery.
- 5 13. Rock Creek near Red Lodge needs accessible area.
- 5 14. Cooney Dam - need for accessible features there, especially latrines.
- 5 15. Bighorn River - needs accessible areas.
- 6 16. The Rookery  
Access needs:  
-wheelchair-accessible trails.  
-make blinds to provide a hunting opportunity and wildlife viewing.
- 6 17. Bearpaw  
Access needs:  
-make recreation shed accessible.  
-needs accessible restrooms.  
-provide fishing stations.
- 6 18. Gjersing Shooting Range  
Access needs:  
-aprons.  
-widened pathways.  
-access for 4-wheelers.
- 6 19. Fresno Dam (Federal site)  
Access needs:  
-cement walkway  
-accessible restrooms.
- 6 20. Faber Reservoir needs accessibility improvements.
- 6 21. Fort Peck needs accessibility improvements.
- 8 22. Hellgate (Canyon Ferry) has the best potential for further development of the sites around the lake.

- 8           23. Black Sandy has good potential for fishing but not camping.
- 8           24. Silos is a good location for access from the highway. It is good for camping and day use but has poor water access.
- 8           25. Shannon and Riverside need more accessibility development.
- 8           26. Spring Meadow Lake  
               Needs:  
                   -dog control; off-season banning is needed.  
                   -litter is a problem; extend clean grass areas.  
                   -sites where young and old can come together.

#### Accessibility to Specific Components or Features

- 1, 4           1. Restrooms  
                   -level of toilets is too low.  
                   -need handrails.  
                   -vault toilets need modification.  
                   -level of toilet seats is too high.  
                   -need braille signs to designate men's/women's restrooms; place within reach on the doors.
- 1           2. Stairways  
                   -need handlebars on both sides.  
                   -steps must be deep enough and wide enough.
- 1           3. Trails  
                   -contour slopes whenever possible.  
                   -provide frequent rest stops along trails.  
                   -boardwalks are more difficult to traverse than natural trails.  
                   -many sites need better than "usable" sites; need to address needs of other disabilities, such as blindness.
- 8
- 4           4. Signs  
                   -put them only on really accessible facilities.  
                   -install braille signs on restroom doors low enough to be within easy reach.

- 4                    5. Montana Outdoors needed in large print. Need articles on plant and flower identification.

#### Accessibility for People with Specific Disabilities

- 1, 6                1. Not all people with disabilities use wheelchairs. Need to be very conscious of needs of others as well. Plan needs to be geared toward all types of disabilities.
- 8, 2                2. Provide more trails for visually impaired.
- 4                    3. Hunting - visually impaired want designated shooter.
4. Hunter education tests need to be given verbally, as an option, for those with learning disabilities.
5. Fishing regulations are complicated and hard to understand for those with learning disabilities. Need to be available in a simpler format.

#### Accessibility to Specific Recreational Activities

- 3, 2, 5            1. Camping, fishing, and other outdoor activities are popular among low income, disabled people.
2. Non-ambulatory people enjoy horseback riding.
3. People have moved to Montana to take advantage of other specialized disability programs (i.e. education). Recreation is a need and desire of these people and all disabled.
4. Disabled, including blind, have interest in bowhunting. May need assistance in sighting.
5. Hiking and nature trails for visually impaired.

#### Hunting

- 4, 2, 8            1. Want drive-in access to areas behind locked gates. Walk-in areas are difficult or impossible for elderly and disabled.
2. Allow a designated shooter for blind and severely disabled people.

3. Rather than going before the legislature to get approval for designated shooter, it should be included in the policy changes in the Transition Plan. It is a right guaranteed under Section 504 of the Rehabilitation Act.
4. Problem with USFS "open road" policy not respecting disabled access sign. Not good cooperation between disabled and non-disabled in use of "open road" policy.
5. Need better enforcement in areas open to disabled.

#### Financial Issues

- |         |  |
|---------|--|
| 4, 2    | 1. Service organizations could be approached to contribute money for access development at Bearpaw; if DFWP provided materials, the community would provide the labor. |
| 8, 3, 6 | 2. Want money spent on a variety of locations to improve accessibility.  |
|         | 3. Concentrate expenditures on high-use sites.   |
|         | 4. Low income, disabled can afford to pay the full price.  |
|         | 5. Difficult to implement for park sites using licensing dollars. (DJ restrictions and prohibition against diversion of license dollars).                              |

#### Capital Projects

- |   |  |
|---|--|
| 4 | 1. Request for a zoo of Montana's native animals. Use mounts for it. |
| 3 | 2. Building accessibility is a major concern.                        |
| 5 | 3. Class 1 and Class 2 state parks may be developed enough.          |
| 6 | 4. Region 6 needs more capital projects.                             |
| 6 | 5. Population of Havre warrants more accessible sites.               |
| 6 | 6. All picnic tables should be accessible.                           |

- 8                    7. Develop model disabled sites - one in each region; concentrate on high-use areas.

#### Wilderness and Wildlife Areas

- 1, 4                1. Make available areas not high impact (remote).  
2. Keep wilderness experience.  
3. Wildlife viewing areas are important to disabled, elderly, pregnant, etc.  
4. Freezout Lake and Ulm Pishkun are being used for wildlife viewing areas.

#### Cooperation With Other Federal and State Agencies

- 3, 4, 2, 8        1. Should be coordination with each other on disabled access issues where possible.  
2. Publish a joint brochure on accessible sites.  
3. Cooperate in general and specifically regarding Fresno Dam and Beaver Creek.

#### Publicizing and Conducting Public Meetings

- 4, 5, 2            1. Publicity should be better. Use radio and TV as well as press. Fewer people receive the newspaper. Increase exposure.  
2. Re-evaluate time of day for meetings - suggest 1 p.m.

#### Communicating Information to Disabled Public

- 4, 1, 3,  
2, 6, 5,  
8                    1. Brochure listing accessible sites, facilities, and programs:  
- do a cooperative brochure with other federal and state agencies.  
- list level of accessibility of specific elements.  
2. Promote accessibility development annually through press, TV, radio.  
3. Promote volunteer clubs through sportsman's clubs.

4. Logo figure should be smiling.
5. DFWP should have information on all accessible sites and facilities throughout the state.
6. Work with Dept. of Commerce to publicize information for tourists, publications, etc.
7. Communicate through Chambers of Commerce.
8. Distribute access brochure to commercial campgrounds and motels.
9. Need to do survey of number of disabled users at sites. Check with SRS on survey information.
10. Need better publicity on what's being done.
11. Use logo or international symbol at accessible sites.
12. Hand out access brochures to those purchasing licenses and permits.
13. Need more public education concerning the need for accessible programs and signs (access to locked gate areas for hunting).
14. Obtain more information from disabled public on which sites to select for development in each region.

#### Others

- |            |  |
|------------|--|
| 4, 6, 8, 2 | <ol style="list-style-type: none"> <li>1. Need better enforcement on hunting areas open to the disabled.</li> <li>2. Reserve accessible campsites for exclusive use of disabled. Concern about sites being available to disabled.</li> <li>3. DFWP doing a good job; on the right track.</li> <li>4. Enforce litter removal at sites.</li> <li>5. Limit dog use at Spring Meadow.</li> <li>6. Make some sites (camping especially) totally accessible so there would be no need for reservations.</li> </ol> |
|------------|--|

## Licensing

Regions in favor of increasing fees and charges:

8, 4, 3, 2, 5, 1.

Regions which want dollars earmarked for access development:

4, 2, 6.

Regions indicating concern that increased cost would be a hardship for low-income people: 4, 8, 6, 1.

Regions which do not feel it would be a financial hardship for low-income people: 3 \*

\* (Note: This person works with low-income disabled and helps them with budgeting.)

Suggestions and comments from all participants:

- Those on SSI and Medicaid (who are low income and disabled) should be able to have price break. SSI certification is adequate. Eliminate doctor sign off; it is costly.
- Charge an additional \$.50 on all licenses. Earmark for disabled access development. Disabled should not bear the brunt of the cost.
- Let there be one federal license good anywhere.
- Disabled paying full price will improve their image and self esteem.
- If you have a price break, it should be for all--not just disabled.
- Make regulations (fishing) more liberal for disabled.
- Had difficulty obtaining a disabled fishing license.
- Even if you generate more dollars, the restrictions on DJ and PR prevent using them at park sites.
- Accept contributions.
- If license fees are increased, make it optional with strong encouragement: \$2 license; \$5 earmarked for accessibility.

## Meeting Evaluations

### Great Falls:

The audience consisted of only two people. Both have disabilities or have a close family member who is severely disabled. One person was active in volunteer work with physically and developmentally disabled people.

Their interests centered on outdoor recreation opportunities, especially fishing and hunting. They want more accessible, usable areas for fishing and day use near Great Falls. In hunting, the concerns were for easier access to restricted areas.

Traveling was a concern, in that there is the frustration of limited accessible facilities. They would like to see greater cooperation and consistency between federal and state agencies regarding accessible areas.

They urged the Department to be aware of the needs of people with learning disabilities, especially in simplified printed materials and required testing.

Regarding licensing, they were in favor of increased fees, but felt low income disabled could be adversely affected. They suggested an across-the-board fee hike of \$.50 for everyone. They were very firmly in favor of earmarking funds specifically for accessibility development.

### Bozeman

There were two people in attendance. They expressed interest and support for the plan.

The most important outcome of this meeting was that one person is a service provider who works with low income disabled in budgeting and other daily skills. She felt strongly that the additional cost of paying a full fee would not create a hardship for her clients. She said the increase was not that significant, and that those who want to recreate will prioritize this into their budgets.

Another suggestion was for a brochure to be produced cooperatively with other agencies to list accessible sites and facilities.

### Helena

Four people attended the Helena meeting. There was discussion about various sites, such as Canyon Ferry and Spring Meadow, and how they could be improved. Interest in trails for the blind was expressed, as well as a general concern that we need to address all disabilities.

They suggested better efforts at publicizing the meetings, obtaining information from the disabled public, and surveying their needs and interests. There was concern about accessible camping sites and how they could be reserved for the exclusive use by disabled.

In regards to hunting, one man felt strongly that the "open gate" policy was a good one and should be encouraged and publicized. All participants encourage cooperative efforts with USFS, BLM, national parks, etc.

They like the notion of "model" accessible sites in each region i.e., more money put into a few sites rather than spread out.

Regarding licensing, they were all supportive of a fee increase, but had concerns about low income disabled, and felt they should continue to get the price break.

### Missoula

Missoula's audience of six was knowledgeable and enthusiastic. They supported of the plan and were eager to help implement it in any way they could.

Some key issues discussed were:

1. The issue of a designated shooter for physically or visually impaired hunters. They felt that this a right guaranteed by Section 504 of the 1975 Rehabilitation Act, and that, as such, this plan must ensure this right without the need for legislative approval.
2. Without any presentation from the department, the licensing issue was presented by a man. The entire group was very supportive of the fee increase for reasons of equality and dignity. They specifically stated that they strongly felt the funds must be earmarked for accessibility development.
3. They supported cooperative efforts with other agencies.
4. They liked the opportunity to hunt behind locked gates and felt it equalized opportunities for disabled.
5. They supported spending money in a variety of locations and sites.
6. This was the most enthusiastic and interested group. They were willing to support this effort wholeheartedly. They had lots of discussion about many recreational interests and needs. One man even has slides showing access problems at DFWP sites, and is going to meet with the regional 504 coordinator to discuss them.

**APPENDIX G**  
**LEVELS OF ACCESSIBILITY**

## APPENDIX G

### LEVELS OF ACCESSIBILITY

One of the purposes of site surveys is to determine the "level of accessibility" of the area as a whole, and of the individual elements. Levels of accessibility are determined by evaluating the usability of certain physical characteristics such as slope of paths, surface materials, and safety features.

Area characteristics affect people with various disabilities in different ways. Levels of accessibility respond to those variations of accessibility needs, while increasing the range of opportunity for people with various disabilities and recreational preferences. Necessary or critical elements (parking lots, access paths, restrooms, etc.) should be made available at the designated level so that visitors can move easily from one activity to another at the same level of accessibility. Areas should be viewed as interrelated facilities rather than as separate components.

Not every element (toilet, campsite, fishing spot, etc.) at a site must be accessible. However, for a site to be accessible or useable, certain critical elements must be accessible and interconnected in order for the site as a whole to truly be accessible.

#### Levels of Accessibility

The following four levels of accessibility will be used in making an overall determination of the level of accessibility in any given area, and in making determinations of accessibility for each of the various elements that apply to an area:

- Level 1 - Accessible
- Level 2 - Useable
- Level 3 - Difficult
- Level 4 - Not Accessible

#### Level 1 - Accessible

##### Users

Level 1 Accessible areas are useable by the greatest proportion of people with disabilities. Generally, the area is useable without assistance by all but the most severely disabled person.

## Guidelines

Level 1 areas include a full range of interconnected accessible facilities, and serve the purpose for which the area is intended. Applicable elements at the areas (buildings, restrooms) meet or exceed the American National Standards Institute (ANSI) criteria for accessibility.

Level 1 areas have the following characteristics: Areas have fully accessible and conveniently located toilets. There is accessible parking for both cars and vans with appropriate aisles and curb cuts. Pathways between the parking and recreation facilities are wide enough for a wheelchair and pedestrian to pass, and are paved with a hard, smooth surface. Pathway edges are marked. Hazardous locations are marked with warning textures for people with visual impairments, and are protected by railings. Fishing areas, for example, have curbs and railings. Information includes signs at the entrance to the area, at the parking lot, and at accessible paths and facilities. In addition, literature is available that describes the area's level of accessibility.

## Level 2 - Useable

### Users

The "average" disabled person can use a Level 2 area with occasional inconvenience, but should face no insurmountable obstacles or danger. Severely disabled or frail people may require assistance.

### Guidelines

Level 2 areas are more challenging to visitors with disabilities than Level 1 areas. Accessible toilets are provided. Parking is available with appropriate access aisles, but pathways and ramps may have slopes steeper than the ANSI criteria, and surface materials, although firm, may be more difficult to traverse. Distances between facilities may be greater than in Level 1. Flat rest areas are provided less frequently. Trail edges are marked, but railings are limited to potentially dangerous locations.

## Level 3 - Difficult

### Users

Level 3 areas are useable by athletic disabled persons without assistance, but the average person with a disability would need assistance.

### Guidelines

Level 3 areas provide fewer facilities and more limited improvements for disabled people, and are more difficult to access than Levels 1 and 2. If toilets are provided at the area, at least one is accessible. Accessible parking and loading is provided. Pathways are wide enough for wheelchair use but may be unpaved and rough. Slopes of pathways are more challenging and level rest stops are infrequent and unimproved. Edges are differentiated only by texture changes, except at dangerous locations where definite edge treatments are developed. Railings are not usually provided.

### Level 4 - Not Accessible

#### Users

Areas and area elements are generally not useable by or accessible to disabled people, even with assistance.

#### Guidelines

One or more of the most critical elements of an area, including restrooms, parking, access paths, and accessibility to the purpose of the area (such as to fish, boat, or camp) is lacking, thereby rendering the entire area inaccessible. Certain individual elements may be accessible, but the area as a whole is not.

**APPENDIX H**  
**MODIFICATION CRITERIA**

## APPENDIX H

### MODIFICATION CRITERIA

If a modification to the area is necessary (if it is a Level 2, 3 or 4), then the following criteria should be used in assigning a modification ranking. If a site or element is accessible (Level 1), it would be modification A.

- A. Modification not necessary.
- B. Can be easily modified: Will take small amounts of materials, equipment, and no more than two staff days. Can be done under Department or local entity purchasing authority.
- C. Needs extensive modification: Will require more work than allowed under B. Will require a construction contract and/or design time to accomplish.
- D. Modification not recommended.

**APPENDIX J**  
**PROGRAMMATIC QUESTIONNAIRE**

## APPENDIX J

### SECTION 504 PROGRAMMATIC EVALUATION

PROGRAM NAME \_\_\_\_\_ EVALUATOR \_\_\_\_\_  
 DIVISION \_\_\_\_\_ DATE \_\_\_\_\_

QUESTION YES NO N/A MOD #

#### GENERAL

1. Does the program have a brochure listing accessible/usable programs? 01

2. Does it separate information (program, services or facilities) for individuals with hearing, visual or mobility impairments and learning disabilities? 02

Please specify: \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_

3. Where can a visitor obtain this information? 03

\_\_\_\_\_  
 \_\_\_\_\_

#### MOBILITY IMPAIRMENTS/COMMUNICATIONS DISORDERS

4. Is the facility where the program is provided physically accessible? 04  
 (Refer to list of accessible sites and to DFWP Accessibility Manual, overall Area Evaluation, and applicable Element Questionnaires.)

Specify barriers, dimensions and problems a wheelchair user might encounter: \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_

5. If not accessible, are alternatives provided so they may obtain as close to the same experience as possible? 05

6. Are changes to the program feasible? 06  
What changes would you recommend?  
\_\_\_\_\_  
\_\_\_\_\_

**HEARING IMPAIRMENTS/COMMUNICATIONS DISORDERS**

7. Is the program office equipped with a 07  
TTY/TDD telephone system for the deaf?  
If so, what is the phone number? \_\_\_\_\_
8. Does the program have available a 08  
current list of resource people (inter-  
preters) for hearing impairments?
9. Does the program have a sign language 09  
interpreter available? On staff \_\_\_\_,  
part-time \_\_\_\_, full-time \_\_\_\_, upon  
request \_\_\_\_, for scheduled programs  
\_\_\_\_\_
10. Does the program provide audio/visual 10  
programs?
11. Are these audio/visual programs 11  
captioned?  
Please specify: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_
12. Are there scripts provided for audio/ 12  
visual programs?
13. How does one obtain these materials? 13  
\_\_\_\_\_  
\_\_\_\_\_
14. For interpretive material (guided 14  
tours, exhibits, general program  
information, etc.) is printed inform-  
ation provided? \_\_\_\_\_  
\_\_\_\_\_
15. How does one obtain these materials? 15  
\_\_\_\_\_

16. Are listening devices provided for hearing impaired visitors (infra-red, induction loop, radio transmission)? 16

Please specify: \_\_\_\_\_

\_\_\_\_\_

17. Are changes to the program feasible? What changes would you recommend? 17

\_\_\_\_\_

\_\_\_\_\_

VISUAL IMPAIRMENTS/COMMUNICATIONS DISORDERS

18. Is interpretive information (self-guided tours or exhibits) provided in recorded audio, large point print, or braille? 18

19. Are there tactile exhibits/opportunities throughout the program? 19

Please explain? \_\_\_\_\_

\_\_\_\_\_

20. Are tactile orientation maps provided for the area? 20

21. Does the program have available a current list of resource people for visual impairments? 21

22. Is non-visual, descriptive language used in audio elements of interpretive programs? 22

23. Are informational brochures provided in recorded audio, large-point, or braille format? 23

Please specify: \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

24. Are changes to the program feasible? 24  
What changes would you recommend?

---

---

---

#### DEVELOPMENTAL DISABILITIES

25. Is the program able to accommodate 25  
the needs of developmentally disabled  
persons on an as-needed basis?

Please specify: \_\_\_\_\_

---

---

26. Are printed materials, audio-visual 26  
programs written (expressed) in simple-  
to-understand language, using simple  
terms and concepts, and at a level no  
higher than fourth grade?

27. Does the program have available a 27  
current list of resource people for  
developmental disabilities?

28. Are changes to the program feasible? 28  
What changes would you recommend?

---

---

---

29. Are instructors and leaders of instruct- 29  
ional programs able to modify the curric-  
ulum or program to a simpler level of  
understanding to allow mentally retarded  
to participate in an integrated class  
with non-disabled people?

30. Can the participants have the option of 30  
being tested orally, if testing is  
required?

504prog

## **APPENDIX K**

### **OUTLINE: ACCESSIBILITY WORKSHOP FOR REGIONAL SECTION 504 COORDINATORS**

## APPENDIX K

### OUTLINE: ACCESSIBILITY WORKSHOP FOR REGIONAL SECTION 504 COORDINATORS

1. Introduction/Overview of Purpose of Workshop
2. Funding/Legality - Discussion of Federal Mandate for Accessibility
3. Disability Awareness
  - a. The disabled and elderly population
  - b. Recreation as a need and a right
  - c. Film: "It's a New Day"
  - d. Presentation by a number of people with various disabilities (or their advocates) describing the specific needs of that group
  - e. Opportunity for all workshop participants to simulate various disabilities
4. Use of Accessibility Manual - Instructions on how to conduct surveys and discussion on specific items on the surveys
5. Field Trip - Groups of no more than four people, accompanied by a Section 504 Accessibility Committee member, conducted trial surveys of various sites. Groups were encouraged to simulate disabilities during the surveys.
6. Discussion of results of field trip, questions, problem-solving.
